**MUI-internal call for faculty positions in the PhD program
'Cellular basis of diseases: Molecular control of metabolism and inflammation'
(FWF-DOC 82)**

We seek applications from a motivated tandem supervisor team to join as faculty our interdisciplinary PhD program 'Cellular basis of diseases'.

We offer funding for one PhD position for 4 years (including bench fees) and an exciting and collaborative research environment within an FWF funded PhD program.

Detailed information on the program can be found under <https://phd-cbdiseases.i-med.ac.at/>.

Successful tandem teams must consist of one physician scientist and one basic researcher. Both must have a strong publication track record, demonstrate the capacity for conducting independent research (3rd party funding) and show experience in supervising PhD students. Their joint research project must have defined goals for the PhD student with interdisciplinary collaborations to address the molecular control of metabolism & inflammation.

Please submit your application as a tandem supervisor team **by November 13, 2020** to cbd@i-med.ac.at. The application must include:

- (1) your individual CVs (with a short statement of your past accomplishments (max. one page), your 10 most important publications, the number of PhD students you have supervised so far and your current research funding).
- (2) a structured summary of the joint PhD research project (max. two pages) that addresses the following points: General scientific background, specific research question, approach and methods, expected results, interactions with the existing CBD faculty.
