

SEMINAR ANNOUNCEMENT

New Trends in Superresolution Microscopy

-Martin Offterdinger

This informal seminar will be a report from the **6th superresolution microscopy club** (Sept, 20th to 22nd, 2016, Barcelona, Spain). You will be informed about novel dyes for STED, new developments for the SP8 gSTED microscope (instrumentation) and novel deconvolution strategies for STED data using Huygens. In addition, a novel method related to STORM will be presented.

October, 20th, 2016, 9:30

CCB, 1st floor, room M01.392
