Vascular Remodelling during Ageing

28 March 2023, 10:30 a.m.

Anichstraße 35, 6020 Innsbruck

Building 3, FKK

Lecture hall 2 (3-G0-115) neurology department

Qingbo Xu, MD, PhD

**Professor of Cardiovascular Sciences
Zhejiang University, Hangzhou, China.**

Professor Xu qualified in Medicine at Peking Union Medical College (PhD) and then the University of Innsbruck (MD), Austria. He was appointed Professor in Cardiovascular Science at University of London in 2000. In 2019 he was appointed a Distinguished Professor and Chair at Zhejiang University School of Medicine.

His presentation will focus on the pathogenesis of arteriosclerosis, to which stem cells may contribute. In this process, ageing could enhance vascular remodelling. He will present some new data on how ageing influences stem cells and arteriosclerosis.
