

### Five key questions at the start point

		check !
1	Which problem will be solved?	
2	Is there an European priority (or does it deal rather with national priority)?	
3	Does any solutions of the problem already exist in your proposal?	
4	Why now? (What will happen if it will not be done now ?)	
5	Why you? (Are you / is the consortium the best qualified for the execution of the project?)
