Invitation

Dear Colleagues,

On behalf of the Austrian Society of Pathology and the Pannonian Working Group of Gastrointestinal Pathology, we invite you to participate in our online course dedicated to the pathology of the large bowel.

The course stands in the tradition of the biannual meetings of the Working Group that, due to the Covid19 pandemic, cannot take place as planned face-to-face. This is very unfortunate. However, we have taken the opportunity to devise a scientific program that contains both, broad educative and state-of-the art lectures.

Pannonian and well-known international speakers will cover all aspects of inflammatory and neoplastic diseases of the large bowel providing a comprehensive overview, including sporadic and hereditary aspects. As is our tradition, challenging cases from the Pannonian countries, presented by residents and young pathologists, will be discussed at the end of the course.

We hope that you appreciate our effort and enjoy the presentations and discussion.

Kind regards
