Neuropharmacology I: Transmitter Systems

(VU3; 042001; Kernfach Neuroscience) Kaufmann W., Schwarzer C.

The course **Neuropharmacology I** will take place from **Nov. 3rd to 7th 2008** (Mo. to Fr.). We start at 9 a.m. each day and finish around 5 p.m..

The course will take place in the labs of the Dept. Pharmacology, Peter-Mayr-Str. 1A.

The aim of the course is to gain theoretical and practical (hands on) insight into transmitter systems:

Practical Work

- 1. Immunocytochemistry
- 2. In-situ hybridization
- 3. Receptor binding
- 5. Microscopy and computer aided evaluation

Lecture topics

- 1. Neurotransmitters and -modulators (biosynthesis, transport, release)
- 2. Receptors (classes, signalling, second messengers)
- 3. Drug targets

Due to **limited lab space** we have to restrict the number of students to 5. If you want to participate, please contact Schwarzer.christoph@i-med.ac.at
