

A PhD student position is now available in the field of experimental pain research in the DPMP.

Requirements are a completed diploma (on a master level) in medicine or biology (or related subjects within the natural sciences). We expect basic knowledge of cell culture, strong interest in neuroscience and motivation to perform a research project on the mechanisms that contribute to the generation of pathological pain states. You will join a young, active and supportive research team and enter the PhD Program in Neuroscience at the Innsbruck Medical University. We offer a team oriented, interactive and friendly working atmosphere with an interdisciplinary approach and modern technology that is established in the lab (functional assay, molecular biology, cellular imaging techniques). Please send your application (letter of intent; CV; proof of your degree) for the position by email to

Univ.-Prof. Dr. M. Kress

DPMP

Fritz-Pregl-Str. 3

6020 Innsbruck
