

The International Society for Neurochemistry (ISN) offers travel grants for participation in the 22nd Biennial Meeting in Busan, Korea in August 2009. Please note that the published deadline of 31st of January has been extended to February 7th, 2009.

Investigators who plan to submit abstracts as the first author are eligible to compete for awards for partial support to attend the Congress. The actual amount awarded to any individual will depend on projected travel costs and will be paid at the Congress. In addition awardees will be reimbursed for the registration fee they have paid. The travel award is not expected to cover the full expenses of the recipient. Preference will be given to younger investigators (less than 8 years from award of first doctoral degree) and advanced PhD students. Priority will be given to persons who have not received support previously and who do not hold a permanent senior position.

Applications should be sent by Email before February 7th, 2009 to the Chair of the Travel Award Committee:

Prof. Alois Saria,
Medical University Innsbruck Experimental Psychiatry Unit,
Innrain 66a, 6020 Innsbruck, Austria.
Email: alois.saria@i-med.ac.at

Detailed information and application forms may be obtained at the ISN web site (<http://neurochemistry.org>) or at the Busan meeting web site <http://www.isn2009.org/>
