

## Lecture Series WS08/09

MZA-Hörsaal

5:15 pm

**Tuesday, Oct 14**

**Matthias Klugmann**

University of Mainz, Dept. Physiol. Chem. +  
Pathobiochem.

*Homing in on a AAV-based gene  
therapy for white matter diseases*

**Tuesday, Oct 28**

**Eckart Gundelfinger**

Leibniz Institute for Neurobiology, Magdeburg

*A New Function for an 'Old' Structure:  
The Brain's Extracellular Matrix Controls  
Glutamate Receptor Trafficking*

**Tuesday, Dec 9**

**Mart Saarma**

Institute of Biotechnology, University of Helsinki

*New family of neurotrophic factors - biology  
and therapeutic potential*

**Tuesday, Dec 16**

**Michael Kiebler**

Medical University Vienna, Brain Research  
Institute

*Translational control and RNA degradation at  
the synapse*

**Thursday, Jan 22**

**Reinhard Jahn**

Max-Planck-Institute for Biophysical Chemistry  
Dept. of Neurobiology, Göttingen

*Molecular mechanisms of exocytotic  
membrane fusion*
