

MUI Lecture Series

The biological basis of schizophrenia

Jeffrey A. Lieberman
Columbia University College of
Physicians and Surgeons
New York

06 October 2017
4:00 pm
Villa Blanka
Weiherburggasse 8
6020 Innsbruck

Jeffrey A. Lieberman, MD, is the Lawrence C. Kolb Professor and Chairman, Department of Psychiatry, Columbia University College of Physicians and Surgeons; Director, New York State Psychiatric Institute; and Psychiatrist-in-Chief, Columbia University Medical Center of the NewYork-Presbyterian Hospital. Dr. Lieberman's work has advanced the understanding of the natural history and pathophysiology of schizophrenia and the pharmacology and clinical effectiveness of antipsychotic drugs. He is the recipient of many national and international honors and awards (e. g. the Lieber Prize for Schizophrenia Research, the Adolph Meyer Award, the Research Award from the National Alliance on Mental Illness, etc).

He is a member of numerous scientific organizations, including the National Academy of Sciences Institute of Medicine. He has authored more than 500 papers and articles published in the scientific literature and written and/or edited ten books on mental illness, psychopharmacology and psychiatry.
