

# MUI Lecture Series

## **Biogenesis of iron-sulfur proteins in eukaryotes: Mitochondria, Mitosomes, Mechanisms and Maladies**

Prof. Dr. Roland Lill,  
Philipps-Universität Marburg

21 January 2019

5:00 pm

CCB - M.01.470

Innrain 80, 6020 Innsbruck

MEDIZINISCHE  
UNIVERSITÄT

INNSBRUCK

Prof. Dr. Roland Lill is Professor of Cell Biology at Philipps-Universität Marburg, Germany and Director of the Institut für Zytobiologie. He is a member of the German Academy of Sciences Leopoldina and of EMBO. In 2003 he received the Leibniz Prize of DFG for his discovery of iron-sulfur protein biogenesis in eukaryotes. The lecture will summarize what we currently know about the molecular mechanism of this essential process of life and its many associated 'FeS diseases'.
