Neurodegeneration & Inflammation: Rolle der Gliazellen

Prof. Dr. Helmut Kettenmann
Max Delbrück Center Berlin

05. March 2020
5:00 pm
HS 2

Frauen- und Kopfklinik
6020 Innsbruck

Since 1993 Prof. Kettenmann is Research Group Leader of Cellular Neurosciences at the Max Delbrueck Center for Molecular Medicine (MDS) Berlin.

His present research program is focused on four topics:

- (1) the extent of gap junction coupling within the glial network and its impact on brain function
- (2) the functional expression of transmitter receptors in microglia
- (3) the response of microglial cells to brain injury and
- (4) the interaction of gliomas with microglia and astrocytes.
