06.30 pm
Tirol Kliniken
Landeskrankenhaus
Haus 8, Großer Saal, GO
6020 Innsbruck

MEDIZINISCHE
UNIVERSITÄT

INNSBRUCK

Dr. Odisio serves as an Associate Professor and Co-Director of Research at the Department of Interventional Radiology, Division of Diagnostic Imaging. Dr. Odisio's main area of clinical and research interest is the use of loco-regional therapies for the treatment and palliation of primary and secondary liver malignancies. Additionally, Dr. Odisio also investigates the use of advanced imaging technologies for improving and predicting outcomes after minimally invasive procedures such as chemoembolization and liver ablation, as well its potential use in combination with hepato-biliary surgical procedures.
