

We are looking for a motivated and creative scientist to join the Biochemical Genetics team at the Medical University of Innsbruck as full-time Post-doc (funded via an Austrian Science Funds, FWF project):

Postdoctoral Fellow in Modeling of Biological Systems

THE PROJECT

The successful candidate will be part of a dynamic and multidisciplinary research team that is investigating pathological mechanisms in the membrane lipid metabolic network in context of inherited mitochondrial diseases. The candidate will be responsible for closely working with other team members to identify, analyze and interpret complex data that is pertinent to the project.

YOUR PROFILE

- PhD in a related field such as Computational Biology, Data Science, or Bioinformatics.
- Hands-on experience in applying bioinformatics and data science methods.
- Proficiency in at least one programming language.
- Documented productivity (e.g. in the form of published research).
- Ability to think independently and critically. Excellent communication and teamwork skills, and an enthusiasm for learning and developing new directions.

WE OFFER

You will be part of a young and active team where your ideas and contributions matter. This position gives you the opportunity to do meaningful work in a welcoming work environment with an open door policy. This includes access to cutting-edge technical equipment and modern research facilities. The Medical University of Innsbruck offers various social benefits and the city of Innsbruck as well as its surroundings are an extremely pleasant place to live. The minimum gross salary for this position is regulated according to the collective agreement (Par. 49 UG, Gehaltsgruppe B1; EUR 4.752,30 gross, 14 times a year).

YOUR APPLICATION

Applications consisting of a CV detailing previous academic achievements, a motivational statement, and the names and contact details of two referees should be addressed to Ass.-Prof. Dr. Markus A. Keller at humgen@i-med.ac.at (Reference code: PD-23-34574A)
