Career Position in accordance with § 99 (5) Universities Act (tenure track) for Cellular Neurophysiology and Signal Transduction

at the Institute of Physiology
(full-time position)

The Medical University of Innsbruck, located in the heart of the Austrian Alps, is the largest and most important medical research and education facility in the West of Austria. We currently teach and train over 3,300 students in six Bachelor-, Master- and Doctoral Programs, most of them in Medicine. A dedicated staff of more than 2,100 employees covers all relevant fields from basic research to the clinical sciences.

We offer qualified candidates a tenure track position according to the § 99 (5) Austrian Federal Act on the Organisation of Universities and their Studies (Universities Act 2002 – UG) and agreements based on rules laid down in a general contract for employees of Austrian Universities ('Universitätskollektivvertrag') as announced in: [Mitteilungsblatt der Medizinischen Universität Innsbruck vom 12.06.2019, Studienjahr 2018/2019, 45. Stk., Nr. 177](#). More details in English are available upon request.

Your profile:

Requirements:

- MD or a comparable qualification
- excellent research and publication record
- potential to head an independent scientific research group
- experience in the conception, acquisition and management of third-party funded research projects
- teaching experience as well as the willingness to be involved in the further development of medical studies
- willingness to participate in interdisciplinary and translationally oriented research
- completed specialist training in physiology, meeting the requirements for acceptance into the list of medical doctors of the Austrian Medical Association
- German language skills, minimum level B2 according to the European reference framework
- experience in molecular and cellular neurophysiology
- experience in modern physiological methods such as CRISPR/Cas9, optogenetics or chemo-genetic tools
- successful conception, attraction and supervision of research grants and projects

Your main tasks:

- the establishment of a research group in the field of cellular neurophysiology and signal transduction
- acquiring national and international third-party funding and leading the respective studies
- research of physiological and pathophysiological mechanisms in the nervous system with electrophysiology, molecular biology and microscopy including multi-photon imaging
- teaching and supervising students in the programs of the University

We offer:

- a competitive start-up package including guaranteed annual base funding
- a varied and largely independent job in a highly attractive work and social environment in a most liveable city
- a dynamic research environment
- numerous further education and development opportunities
- support through central service facilities
- various attractive additional company benefits (including but not limited to excellent support through our service-oriented administration, childcare support, dual career consultation, and an inhouse pension fund in addition to the statutory social insurance)

The current position (full-time employment) commences with a 6-year contract based on a mutually accorded qualification agreement. If the qualification goals are met following a positive evaluation, the contract can be extended indefinitely with the job title of 'associate professor'.

A salary based on group B1 (or A2 after fulfilment of a qualification agreement based on a positive evaluation) of the collective contract ('Universitätskollektivvertrag') for Austrian university employees.

Application:

The complete application documents (see Application Guidelines under: <https://www.i-med.ac.at/karriere/laufbahn.html>) must be sent digitally (as pdf files) in German or English to the following e-mail address: laufbahnprofessur@i-med.ac.at

Deadline for submissions is **Friday, 23rd April 2021**

Non-EU citizens must fulfil the relevant Austrian legal requirements regarding residence and work permits.

Applicants are not entitled to compensation for travel expenses with reference to this tender.

The Medical University of Innsbruck is an equal opportunity employer. We seek candidates who embrace and reflect diversity and encourage minorities/women/individuals with disabilities to apply.

In case of inconsistencies between the German and the English versions of this tender, the legally binding version is the German one.
